PROJECTS

- Hookify** | *Next.js 16, TypeScript, Python, FastAPI, librosa, Supabase, Vercel, Railway* 2025 – 2026
- Built a full-stack AI-powered music web app that detects and plays only the catchiest 15-second hook of any song; **live at hookify-app-chi.vercel.app** with real iTunes top-25 chart integration.
 - Engineered a **custom AI hook-detection model from scratch** (Python/librosa) combining RMS energy, spectral centroid, onset strength, and chroma self-similarity to locate the hook window with up to 87% confidence; deployed as a FastAPI microservice on Railway.
 - Architected a **multi-service backend** (Next.js + FastAPI + Supabase PostgreSQL) with Google OAuth, Row Level Security, and 4 relational tables; shipped **20+ features** including TikTok-style swipe feed, playlist management, public shareable links, and a real-time admin analytics dashboard.
- Where-is-My-Faculty** | *Node.js, Express.js, MongoDB Atlas, Tailwind CSS, JWT, AWS EC2* Aug – Sep 2024
- Architected a **multi-role academic portal** (Admin / Faculty / Club / Student) serving 500+ university users, centralising club events and faculty scheduling with role-based access control.
 - Developed **15+ RESTful APIs** with JWT middleware guards; designed a normalised MongoDB Atlas schema with 5 collections achieving sub-300ms response time; deployed backend on **AWS EC2** with MVC architecture.
- Credit Card Fraud Detection** | *Python, TensorFlow/Keras, Scikit-learn, SMOTE, Pandas* Sep 2025
- Built an ANN classifier on **284,807 transaction records**; applied SMOTE to address 0.17% fraud-class imbalance, improving F1-score from 0.61 to 0.74 and achieving **73% accuracy** with 89% recall on the fraud class.
